

Anti-GZF1 Rabbit IgG Affinity Purify

Polyclonal Antibody

Cat.NO.: PA01192

3th Edition

Description: GZF1 has been identified as a gene whose expression is induced by a neurotrophic factor, GDNF. It codes a protein which has BTB/POZ domain in its N-terminal region and 10 of zinc finger motifs in its C-terminal area from the center. It has been known by performance analysis that GZF1 is a transcriptional repression factor which sequence-specifically binds to DNA and the binding sequence is present in transcription control region of HOXA10.

Antigen: Synthetic peptide of the part of Human GZF1

Form: Lyophilized product from 1% BSA in PBS containing 0.05% NaN₃

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: React with human and mouse GZF1
