

Anti-RET Finger Protein (RFP) Rabbit IgG Affinity Purify

Polyclonal Antibody

Cat.NO.: PA01322

3th Edition

Description:RET finger protein (RFP) belongs to the large B-box RING finger protein family and is known to become oncogenic by fusion with RET tyrosine kinase. Although RFP is reported to be a nuclear protein that is present in the nuclear matrix, its function is largely unknown.

Antigen:Synthetic peptide for C-terminal portion (IDGFSGHVGNGHSMETSP) of RFP

Form:Lyophilized product from 1% BSA in PBS containing 0.05%NaN₃

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:The antigen peptides is selected a common region between human and mouse
