

Anti-Human/Mouse/Rat Acetyl-ATF5 (Lys29) Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA01419

3th Edition

Description: ATF5 or Activating transcription factor 5, binds to cAMP inducible promoters and is involved in gene transcription. This protein binds the cAMP response element (CRE) (consensus: 5'-GTGACGT[AC][AG]-3'), a sequence present in many viral and cellular promoters. ATF5 plays a role in inhibition of nerve growth factor induced neuronal outgrowth and regulation of neurogenesis.

Antigen: Synthesized peptide derived from the human ATF-5 around the acetylation site of K29.

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Widely expressed with higher expression levels in liver.
