

Anti-Human/Mouse ALG12 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA12984

3th Edition

Description: This gene encodes a member of the glycosyltransferase 22 family. The encoded protein catalyzes the addition of the eighth Human, Mouse mannose residue in an alpha-1,6 linkage onto the dolichol-PP-oligosaccharide precursor (dolichol-PP-Man(7)GlcNAc(2)) required for protein glycosylation. Mutations in this gene have been associated with congenital disorder of glycosylation type Ig (CDG-Ig) characterized by abnormal N-glycosylation.

Antigen: Recombinant protein of human ALG12

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Expressed in fibroblasts.
