

**Recombinant Human Death Receptor 6/DR6/TNFRSF21/CD358 Protein(C-Fc)**

**Cat.NO.: TP04734**

3th Edition

**Synonyms:**Tumor Necrosis Factor Receptor Superfamily Member 21; Death Receptor 6; CD358; TNFRSF21; DR6; UNQ437/PRO868

**Description:**Tumor Necrosis Factor Receptor Superfamily Member 21 (TNFRSF21) is a type I transmembrane receptor that includes four extracellular cysteine-rich motifs and a cytoplasmic death domain. DR6 is highly expressed in heart, brain, placenta, pancreas, lymph node, thymus and prostate. DR6 may activate NF-kappa-B and JNK to promote apoptosis and T-cell differentiation. In addition, DR6 binds with N-APP, which is released by the deprivation of Trophic-factor. It triggers caspase activation and degeneration of both neuronal cell bodies (via caspase-3) and axons (via caspase-6). DR6 is also expressed on the tumor cell lines and can be induced by TNF- $\alpha$ .

**Form:**PBS

**Molecular Weight:**61.7 kDa

**Sequences:**Gln42-Leu350

**Purity:**> 95% by HPLC

**Concentration:**

**Endotoxin Level:**<1.0 EU per 1 ug of protein (determined by LAL method)

**Storage:**Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
